information age

INDEX TO VOLUME 8: 1986

AUTHOR

Bigelow, R Computers and privacy — an American perspective 134
Bing, J Beyond 1984: the law and information technology in tomorrow's society 85
Feeney, T Security issues and features of database management systems 155
Greguras, F M and Humphreys, I H International taxation of software 109
Greguras, F M, Linhares, K and Stevens, M Proposed regulations on federal government rights in computer software 168
Jones, B O Choices in an information age 195
Kirby, M D Human rights — the challenge of new technology 200
Lobel, J Impact of technology on computer security 77
Murphy, I Aspects of hacker crime: high-technology tomfoolery or theft? 69
Ortiz, J Security and local area networks 48
Owen, K Computer security: IFIP addresses the practical issues 81
Pangalos, G Conceptual database schema design 162
Pangalos, G Information oriented approach to structured analysis and design 43
Pounder, C Police computers and the Metropolitan Police Part III: data protection and the control of police computers 3
Rice, R Privacy, freedom and public-key cryptography 208
Roberts, J Information as a corporate resource 111
Seipel, P Pitfalls of the electronic revolution 215
Sheard, K Information technology marketplace 74
Shipley, C and Broome, B Rural telephone network: maintaining viability after deregulation 36
Taylor, G S and Davis, R H Computer software and copyright law 18
Taylor, G S and Davis, R H Computer software and the patent system 95
Taylor, G S and Davis, R H Legal issues illustrated in developing computer software 141
Umpleby, T Management of systems projects from initiation to handover 220

TITLE

Aspects of hacker crime: high-technology tomfoolery or theft? Murphy, I 69
Beyond 1984: the law and information technology in tomorrow's society Bing, J 85
Choices in an information age Jones, B O 195
Computers and privacy — an American perspective Bigelow, R 134
Computer security: IFIP addresses the practical issues Owen, K 81
Computer software and copyright law Taylor, G S and Davis, R H 18
Computer software and the patent system Taylor, G S and Davis, R H 95
Conceptual database schema design Pangalos, G 162
Human rights — the challenge of new technology Kirby, M D 200
Impact of technology on computer security Lobel, J 77
Information as a corporate resource Roberts, J 111
Information-oriented approach to structured analysis and design Pangalos, G 43
Information technology marketplace Sheard, K 74
International taxation of software Greguras, F M and Humphreys, I H 109
Legal issues illustrated in developing computer software Taylor, G S and Davis, R H 141
Management of systems projects from initiation to handover Umpleby, T 220
Pitfalls of the electronic revolution Seipel, P 215
Police computers and the Metropolitan Police Part III: data protection and the control of police computers Pounder, C 3
Privacy, freedom and public-key cryptography Rice, R 208
Proposed regulations on federal government rights in computer software Greguras, F M, Linhares, K and Stevens, M 168
Rural telephone network: maintaining viability after deregulation Shipley, C and Broome, B 36
Security and local area networks Ortiz, J 48
Security issues and features of database management systems Feeney, T 155

SUBJECT

Artificial intelligence

Expert Systems Club 239
Japanese fifth generation 235
User association launched 182

Book reviews

A guide to the Data Protection Act Savage, N and Edwards, C 233
Computer contracts handbook Rennie, M-T M 230
How to comply with the Data Protection Act Evans, A and Korn, A 229
Information technology and further education Vincent, B and Vincent, T 229
Legal protection of computer hardware and software marketed in Europe 230
Management guide to computer security Talbot, J R (ed. Powell, D M) 228

Book reviews *contd*

Purchasing of computer software products **Dilloway, C** 231
Office automation pilots: first evaluation results 232
Telecommunications texts 176
The computer users legal guide **R L Hagelshaw** 228

Business

Britain mounts high-technology challenge 237
Businesses buy wrong systems 178
CHAPS expanded 57
Guide to starting high technology company 116
Spectrum census 55

Calendar 128, 191

Comment 67, 131

Communications

Broadband communications services for the 1990s 115
BSI standard on telecommunications apparatus 186
Communications services references 239
Drafts for development 185
Europeans aim to standardize communication 240
£5M investment for electronic message services 184
Japanese newspaper to print in London 184
Large-span optical fibre link 186
Medics interact across London 242
OSI standards get Government backing 115
OSI user trial completed by DHSS 185
Rural telephone network: maintaining viability after deregulation **Shipley, C L and Broome, B J** 36
Satellite TV is nearer 116
US–European digital satellite communications link 185

Computer misuse

Aspects of hacker crime: high-technology tomfoolery or theft? **Murphy, I** 69

Conferences

1986 Computer law symposium 227
First international expert systems conference and exhibition 224
Systems development — facing the challenge 227
The Salzburg Seminar 172

Data processing

Computer education award 55
Conceptual database schema design **Pangalos, G** 162

Data protection

Beyond 1984: the law and information technology in tomorrow's society **Bing, J** 85
Data protection kit 54
Data protection report 237
DIY data protection 181
Police computers and the Metropolitan Police **Pounder, C** 3
Questions answered 183
Register can be viewed 182

Education

Learning skills in Europe 238

Information systems

Business database 179
Cancer investigation program 181
Information as a corporate resource **Roberts, J** 111
Management of systems projects from initiation to handover **Umpleby, T** 220
R&D database online 54
Shakespeare in the '80s 57

Information technology

BSI sets up new IT council 180
Chance for cable industry to test new technology 55
Collaborate to compete 243
Europe responds to call 180
European IT conformance testing 178
Information technology marketplace **Sheard, K** 74
IT skills shortage 241
Pilot projects summarized 177
RACE takes off 179
University launches IT centre 184

Legislation

Computer software and copyright law **Taylor, G S and Davis, R H** 18
Hacking should be a crime 182
New technology 234
Software theft illegal 56
South African export ban 54

Market forecasts

Artificial intelligence products 189
Business videotex systems in the USA 190
Cable TV communications in Western Europe 1985 124
Commercial image processing systems in Europe 63
Computer graphics business hardware 119
Computer graphics workstations in Europe 118
Consumer electronic banking 58
Data communication services in the USA 187
Expert systems in Europe 59
Fault-tolerant computers in Europe 125
Identification and verification systems 187
Image processing in office automation 244
Impact printers market in Europe 62
ISDN: opportunities and issues 244
Key vertical markets for micro-computer software — financial, legal and real estate segments 123
Legal small computer market 59
Magnetic disc drive and disc controller market in Western Europe 245
Micro to mainframe communications 188
Military artificial intelligence 124
Modem markets 62
Modems, multiplexers and data concentrators 121
Natural language computing: the commercial application 120
Office automation software market 126
Optical communications market in Europe 127
Personal instruments: analogue input for PCs 122
Remote computing services market 118
Robot vision systems 60
Signal processing market opportunities 189
Speech recognition and voice synthesis 60
Store-and-forward voice switching 120
Teleprinting and electronic mail 61
The market for manufacturing systems for small manufacturers 119
The personal computer add-in market 122
The software protection products market in the USA 246
The videotex business market 126

Policy

Harvard reports 234

Privacy

Computers and privacy — an American perspective **Bigelow, R P** 134

Regulation

Proposed regulations on federal government rights in computer software **Greguras, F M, Linhares, K and Stevens, M** 168

Security

Computer security: IFIP addresses the practical issues **Owen, K** 81
Computer technology 238
Fingerprint security systems 56
Impact of technology on computer security **Lobel, J** 77
Pitfalls of the electronic revolution **Seipel, P** 215
Privacy, freedom and public-key cryptography **Rice, R** 208
Security and local area networks **Ortiz, J** 48
Security issues and features of database management systems **Feeney, T R** 155
Smart card uses fingerprints 241

Social issues

Choices in an information age **Jones, B O** 195
Human rights — the challenge of new technology **Kirby, M D** 200
Social aspects of computers 183

Software protection

Computer software and the patent system **Taylor, G S and Davis, R H** 95
International taxation of software **Greguras, F M and Humphreys, I H** 109
Legal issues illustrated in developing computer software **Taylor, G S and Davis, R H** 141

Software development

Information-oriented approach to structured analysis and design **Pangalos, G** 43
STARTS report update 242

Telecommunications

European telecommunications 240
Telecommunications spending 236
Telecommunications tariff service 243
Telematics report 236
